

GenAI Assistive Use Acknowledgement

Tool(s) used (name + version/URL): Claude (Sonnet 4.7)

Purpose(s) (tick): ☐ proofreading ☐ clarity/tone ☐ translation ☒ code testing ☒ brainstorming/outlining ☐ other: _____

What I changed/kept based on the GenAI output (1–2 sentences):

Making sure that the solutions being offered were correct and referenced ensuring me and my group would learn more about the subject. Using tools we already knew how to use like Quarto to render jupyter notebooks and LaTeX to make everything look nicer are ways of challenging the AI more carefully.

Verification I performed (tick): ☒ checked facts/calculations ☒ verified references ☒ ran code/tests ☒ compared to sources ☐ plagiarism check (non-AI)

respected (1–2 sentences on what I did not use AI for, per brief):

Researching and interacting with the provided materials on moodle explicitly, whilst using instructions and formulas given in lectures manually, implementing these into code and LaTeX conversion. AI was used in assisting in any code corrections if errors were encountered.

Declaration: I am the author of this work. AI was used only for the assistive purposes stated. No personal/sensitive data or third-party confidential material was uploaded to non-approved tools. I accept responsibility for accuracy, originality, and proper citation
